BellaDati Solution

This project had 3 major components:

Component 1: Develop all kinds of Routine Operation and Management Digital Data

Operational Reports and Analytical Reports are used across the whole company. Geographical distribution and customer segmentation is utilized by sales and marketing department to optimize sales and results of marketing campaigns.

Component 2: Highly customized feel and look of menu using BellaDati platform advanced features

Component 3: Sending SMS and emails with reports and links

BellaDati SMS gate is used to send SMS to users, customized emails with attachments.

BellaDati Project Achievements

With BellaDati Agile BI, customer has precise and timely KPIs of each product and business unit results, is able to monitor company’s performance and run assets under management portfolio etc. Business users like ease of use provided by BellaDati and highly customized feel and look. The customer required advanced analytics that are innovative and will be able to solve their tasks in the future as for example machine learning.

The implementation partner likes the easiness to implement Belladati, to create customized feel and look that are critical for the China market and to create numerous reports for the customer very fast.
